[€] Pregnant smoking rate in bold type from 2005 and in regular type from 2002.

* Youth smoking rates from most recent years available; in bold type from the Youth Risk Behavioral Surveillance (YRBS); in regular type from Youth Tobacco Surveillance (YTS); and in italics from state-specific surveys; OR data are for 11th grade only. WA data are for 10th grade only. Because of different surveys and years, state rankings based on youth smoking cannot be done.

† States that have not increased their tax rate since January 1, 1999 or before are in **bold** type.

‡ Ranks are based on CDC's 2007 recommendations for tobacco prevention spending in states.

§ Adding in nationwide deaths from secondhand smoke (almost 50,000) and deaths to infants from mothers smoking during pregnancy (more than 700) brings the nationwide death total to more than 440,000 per year. CDC, <http://www.cdc.gov/mmwr/PDF/wk/mm5745.pdf>.
